Treadwell Polished Concrete Floor Cleaning & Care

Concrete Cleaning Instructional Video: <https://youtu.be/arFkqq9f4LM>

Daily Maintenance

- Dust mop the floor daily with a microfiber pad to keep dirt particles off the floor. It is very important to remove dirt, sand and gravel as they are abrasive and will eventually dull the polish if not cleaned up properly.
- In high traffic areas, use an auto-scrubber with PH neutral cleaning product

Weekly Maintenance

- Dry mop/broom floor first to remove large particles from the floor surface.
- Use an auto scrubber equipped with a “natural hair pad” for polished concrete while using a neutral cleaning product formulated to suspend the dirt particles so they can be more easily removed. Using water only leaves much of the dirt on the floor, where it will eventually abrade and discolor the surface.
- If the facility is too small to warrant using an auto-scrubber, we mop the floor instead.
- Try to clean spills and stains from the floor as quickly as possible so they don't absorb into the surface.
- Give the cleaner enough time to start breaking down the grime, such as grease and other contaminants, and then suspend the particles. If you apply a cleaning agent and then immediately vacuum it or mop it from the surface, the cleaner will not have sufficient time to work.
- Make sure the cleaning solution does not dry on the surface. This can be accomplished by cleaning small areas and making sure the entire process is complete before moving on to other areas.
- Do not use cleaners that are high alkaline or contain

Cleaning Chemicals

- Use a PH neutral cleaning product such as Rejuvenating Cleaner by Ameripolish - <http://www.ameripolish.com/products/Rejuvenating-Cleaner-23>
- Do not use acidic cleaners, wax strippers, no rinse cleaning solutions, ammonia, chlorine or soap based cleaners.
- Local supplier for cleaning chemicals – Superior Surface Solutions, 816.4715227

Bi-Annual

- Follow “weekly” maintenance plan.
- Burnish the floor using a high-speed burnisher equipped with diamond impregnated pads (grit of pad equal to that of floor finish).

5-7 Year

- Reapply guard and use burnisher to remove excess.
